Description

If you click twice on a form - e.g. creating an issue or creating a time entry then I end up with duplicate entry in the database.
Tested on the demo site also. It shows the same behavior.

I think this is not a "defect", since duplicate issues are valid, in fact.
However, disable the submit button after clicked will be a better way to avoid this mistake.

- Status changed from New to Closed

- Resolution set to Duplicate

Same as #6555, fixed in r9391 for 1.4.0.
