Description

I keep on seing this message in the logs whenever I hit the Repository tab in my project.

I'm quite sure this is the line generating the noise.

History

I have the same problem (with Redmine 2.0.3). But maybe this is depending on the git version. I have the error on one machine running Git 1.5.6.5 (Debian Lenny), but on a machine with Git 1.7.0.4 (Ubuntu Lucid) there are no problems - with the same repository (I pushed to both).

#12505 (with a patch) looks like a duplicate of this one. If my assumption is correct, the problem is not realted to the version of git but to the frequency in which git gc is run.
