**Description**

Adding the RESTful GETs for repositories would allow proper remote project operation.

For example, this would allow a proper implementation of reposman (#11976).

### History

**#1 - 2014-09-03 02:08 - Mélanie Gault**

I'm very interesed by this feature too..

**#2 - 2014-09-13 15:10 - Guillaume Perréal**

I would like to see this feature implemented too. It would allow to write a proper implementation of a remote repository manager.

Also very keen for this.  Repositories are a brilliant feature of Redmine but we make a lot of use of the API and are limited without them.  Purely RO queries/GETs of existing Repositories would be a great start.
