Description

I frequently bcc redmine, when I send project updates to clients.

In the case redmine is not the only receipient, I'd appreciate an option to hardcopy the email header into the ticket note like:

```
Update from E-Mail
To: <recipients list>
Cc: <cc list>
```

Hi,
is there an option to assign this issue to current development version?

The target version for this issue cannot be set because no one has posted a patch yet.
