Description

I just met the problem to do a thousands click when i want to have many version status set in one step. It would be great to have a similar javascript context menu for version view like we have for issues.
Escpecially the status attribute but also a bulk edit form for beeing able to apply attrib changes /custom and standard fields) to all versions then would be very useful.

History

#1 - 2017-01-10 07:28 - Go MAEDA

- Has duplicate Feature #24792: support bulk update state of version. added

#2 - 2021-10-12 08:24 - Yuichi HARADA

- File versions-bulk_edit.png added

- File 13315.patch added

Similar to the issues, you could be bulk edit status and sharing or bulk delete from the context menu of the versions list (Project > Settings > Versions).
