Resolution:	Fixed		

Description

See #7071, it also happened to me a couple of times. If two plugins share the same partial settings name, the first will override the second and you won't be able to configure the second. It shouldn't be hard to add a warning on top of the "Plugins" page to suggest that the author contact plugin authors to fix this.

Revision 13336 - 2014-08-13 06:56 - Jean-Baptiste Barth

Add a warning if two plugins have the same settings partial name (#14008).

History

#1 - 2014-08-13 07:03 - Jean-Baptiste Barth

- Status changed from New to Closed

- Target version set to Candidate for next major release

- Resolution set to Fixed

I've been bitten by this problem once more recently, so I added a warning in r13336.

#2 - 2014-08-13 07:04 - Jean-Baptiste Barth

- Target version changed from Candidate for next major release to 2.6.0
