- Category set to Database

#3 - 2019-01-10 03:06 - Marius BĂLTEANU

- Related to Defect #30367: "Last updated by" filter causes an SQL error with MariaDB added

#4 - 2019-04-15 15:51 - PICCORO LenzMcKAY

umm i can see that [#30367](#) was closed, does now support mariadb? or at least runs on mariadb 10.1? (seems 10.1 are directly related to 5.5 release of mysql)

Hello!
With Debian 10 (buster) mysql-server is being kicked from the official debian repos: [1] mariadb 10.3 is the new standard on debian. It would be great to know if this will work for redmine 4.1?

Thanks!

Kind Regards,
Matt

I set up Redmine for the first time about 2 years ago on a Synology NAS with MariaDB10 (I think at first even with 10.2, now with 10.3) and so far I have never had problems that ultimately related to the database support itself ... I think already that MariaDB (10.3) can be included in the official support list ...

#11 - 2023-10-31 15:36 - C S

There are any news?
In my Opinion it works...

It's hard to add this to the official support list without having MariaDB in the official CI matrix.

Hello!

The page that tells about Redmine installation still reports what can be seen in the screenshot.

4 [On Redmine < 5.1.1 MySQL 5.6 or higher and MariaDB have known issues \(#19344, #19395, #17460\)](#)

Has there been any update or resolution regarding the issue mentioned in that note?

I arrived here by clicking on "#19395".

Thanks in advance!

Andrea
