Description

The project name is before the hierarchy triangles thus shifting them.

To fix that, the project name can be put in the link which has the css with the triangle image :

```
            only_path = options[:only_path].nil? ? true : options[:only_path]
            # fix
            text = h("(#{issue.project}) - ") + text if options[:project]

            # Smile specific options + :hours_by_day
            s = link_to(text, issue_path(issue, :only_path => only_path,
                        :hours_by_day => options[:hours_by_day],
                        :debug => options[:debug]
                       ),
                        :class => issue.css_classes, :title => title)
            s << h(": #{subject}") if subject
            #s = h("#{issue.project} - ") + s if options[:project]
```

Fixed in r15374. I didn't integrate the project name in the link as proposed in the patch. Just a few changes to the CSS.

Thanks a lot for the css fix !
