Category:		**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	

Description

I use redmine with https, and have some problemes with redirect and i suppose :home_url

When a form (login, logout for example) are submit, I lose the https and arrive on a page with http protocol.

https protocol is set in administration > setting

- Status changed from New to Closed

- Resolution set to Invalid

To tell Rails to use https on redirects, set the X_FORWARDED_PROTO header to https.
Eg, if you're using apache:

```
RequestHeader set X_FORWARDED_PROTO 'https'
```

The https flag that you see in the application settings is used for urls generated in emails only.
