

## Redmine - Patch #30739

### Project Custom Fields configuration : split by tracker

2019-02-04 15:28 - Jérôme BATAILLE

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Custom fields	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Candidate for next major release		
<b>Description</b>			
This patch splits Custom Fields Fieldset in Sub-Blocks :			
<ul style="list-style-type: none"><li>• Custom Fields for All trackers</li><li>• Custom Fields for Multiple trackers</li><li>• Custom Fields for a specific tracker</li></ul>			
This is quite more clear to show Custom Fiel Configuration by tracker. The <b>check/uncheck all</b> Javascript link has been removed for Custom Fields configured for all trackers.			
			

#### History

##### #1 - 2019-02-04 17:34 - Jérôme BATAILLE

- File *RM\_30739\_Project\_Custom\_Fields\_configuration\_-\_split\_by\_tracker\_git.diff* added

- File *RM\_30739\_Project\_Custom\_Fields\_configuration\_-\_split\_by\_tracker\_svn.diff* added

Please review this simple patch, that is mainly bringing appearance changes, no feature change.

The JS call to select/unselect all block Custom Fields has been personalized for each block also.  
I have also used existing translations, I think it remains understandable.

##### #2 - 2019-02-19 15:21 - Jérôme BATAILLE

Hi, can you review this simple patch ? I think this makes Project Custom Fields configuration quite more clear.

##### #3 - 2019-02-20 05:21 - Go MAEDA

- *Target version set to Candidate for next major release*

##### #4 - 2019-03-08 19:18 - Jérôme BATAILLE

- File *RM\_30739\_Project\_Custom\_Fields\_configuration\_-\_split\_by\_tracker\_svn.diff* added

Performance fix applied.

##### #5 - 2019-04-21 15:49 - Jérôme BATAILLE

- File *custom\_fields\_configuration\_by\_tracker\_before.png* added

Hi, Thanks to plan this for the next Major release.

Could this simple patch be integrated in V4.1 ?

It seems quick to review. The only thing that could be enhanced it to calculate separated custom fields lists in the controller action.

To view the difference with the previous layout, here is a scree capture :

**#6 - 2019-12-10 18:51 - Jérôme BATAILLE**

I suppose we can close this issue as it was integrated in the following plugin :

[http://www.redmine.org/plugins/redmine\\_smile\\_project\\_enumerations\\_custom\\_field\\_format](http://www.redmine.org/plugins/redmine_smile_project_enumerations_custom_field_format)
