

Redmine - Patch #38796

Improved display of tracker selection area in custom field settings

2023-06-30 22:20 - ryo ito

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Administration	Estimated time:	0.00 hour
Target version:	Candidate for next major release		
<div>Description</div> <p>The items in the tracker selection area of the custom field setting screen are not properly aligned, making it difficult to see and easy to operate when a large number of trackers are created.</p> <p>Therefore, we have modified it to be properly aligned like the issue tracking tab in the project settings, so that it can be easily viewed even when many trackers are displayed.</p> <ul style="list-style-type: none"><li>before trackers_selection_before.png</li><li>after trackers_selection_after.png</li></ul>			

History

#1 - 2023-12-29 09:20 - Go MAEDA

- Target version set to Candidate for next major release
