Resolution:	
Description I hope that we can copy (and paste) RSS/REST API keys to clipboard with javascript since key value is pretty long.	
Related issues: Related to Redmine - Feature #29214: Button to copy PRE block content to clip... New

You can already copy the key by selecting the text, we might be able to make it a little easier though by copying some of the features of Holger's Checkout Plugin.

I've added above Redmine Checkout plugin. This is so nice and this looks like GitHub's copy URL function :)
It seems the function to copy the URL for checkout is using some swf(Flash) object.

I think it's nice if this javascript library was included not only plugin but also rdmine itself.

+1

#5 - 2018-07-10 00:38 - Go MAEDA

- Related to Feature #29214: Button to copy PRE block content to clipboard added

#6 - 2019-07-17 10:48 - Yuichi HARADA

- File `add_link_to_copy.png` added

- File `fixed-5953.patch` added

When the API access key is displayed, the copy link is displayed. Click this link to copy the API access key to the clipboard.

`add_link_to_copy.png`
I attached a patch.

Thank you for posting the patch. I tried out it and noticed the following points:

- There is no feedback when you click the Copy link. Users may confused and click the link again and again
- In Redmine, copy.png and the label "Copy" means creating an object by cloning the existing one. I think it is better to use another icon or label

#9 - 2021-03-19 03:24 - Yuichi HARADA

- File fixed-5953-v2.patch added

Fixed to work with JavaScript function copyTextToClipboard added to the trunk ([r20816](#)).

Sorry, I haven't fixed these yet.

+1 for this to be core feature

#11 - 2021-11-15 12:44 - Aleksandar Pavic

+1 for this to be core feature and [#29214](#) the pre tag is even more important, especially good use-case is copying blocks of code...
