Redmine - Defect #34778

Inconsistencies working with workflow permissions

2021-02-20 19:59 - Frederico Camara

Status:	Confirmed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Issues workflow	**Estimated time:**	0.00 hour
Target version:			
Resolution:		**Affected version:**	4.1.0

Description

Found two problems working with setting workflow permissions to read_only:

On Admin > Workflows > Permissions:
when you set tracker_id to "read_only" for the first tracker/status, on a project that has this tracker as the first tracker, you can't chose another tracker when creating a new issue,
when you set subject to "read-only" for the first tracker/status, you can't create a new issue with this tracker, as it it required and has no default.

Editing an issue
after you change from a status that have tracker_id set to "read-only", to another status that doesn't
before you save
when you try to change the tracker to another tracker
the page refreshes and doesn't change the tracker_id

History

#1 - 2021-02-21 06:02 - Go MAEDA

- Category set to Issues workflow

#2 - 2022-01-03 01:38 - Go MAEDA

- Related to Defect #29300: New issue can't select read-only tracker added

#3 - 2022-01-03 01:38 - Go MAEDA

- Related to Feature #28150: Ability to choose Fields permissions for new issue added

#4 - 2022-01-03 01:45 - Go MAEDA

- Status changed from New to Confirmed

Maybe allowing to configure fields permission for new issues (#28150) is a nice solution.
