# Redmine - Feature #8915

# Use \*.exe (e.g. hg.exe) for SCM command on Windows

2011-07-27 11:13 - pasquale [:dedalus]

Status:	Reopened	Start date:	2011-07-27

Target version:	Candidate for next major release		
Resolution:			
Description			

Since the begin, I have configured my mercurial repos using mercurial\_adapter.rb (and not configuration.yml that isn't in use on my server): all have worked fine. But after the upgrade to 1.2.1 I have an error (see <u>bug-in-action.png</u>): I suppose that this error is raised by the double-quotes over hg: if I delete the quote and hit the same command via terminal all work fine.

#### #3 - 2011-07-28 05:06 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Cant reproduce

All SCMs use same logic, such as "svn", "git". I tested on MingW Ruby, and I don't use Bitnami. I can't reproduce.

Try set "hg.exe" in configuration.yml.

I have installed the mercurial-python release for Windows and not tortoiseHg as suggest in configuration.yml... and I don't want to install tortoiseHg into my server: another choice?

As I described at configuration.yml, "hg.cmd" does not work.

There is only Mercurial Windows installer. https://bitbucket.org/tortoisehg/thg-winbuild/downloads

I have used [1] http://mercurial.selenic.com/release/windows/mercurial-1.9.win32-py2.6.exe until redmine 1.2.1 release, and all work fine (without use of configuration.yml);

Now, with your suggest, I have also installed [2] http://mercurial.selenic.com/release/windows/mercurial-1.9-x86.msi and repos return to work (without use of configuration.yml but mercurial\_adapter.rb): in conclusion after redmine release 1.2.1 it seems that I need to install both [1] and [2] to work with repos.

Thanks for your attention: maybe now we can close this bug as Worksforme
