Category:		**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	

Description

Hi, I was following the instructions below to proceed with settings for incoming emails in redmine.

http://www.redmine.org/wiki/redmine/RedmineReceivingEmails

I have opted for the IMAP option.

The command is the following:

C:\Ruby187\bin>rake -f "c:\Program Files\redmine-0.9.5\Rakefile" redmine:email:receive_imap RAILS_ENV="production" host=imap.google.com username=redmine@xxxxxxxxxx.ca password=xxxxxxxx ssl=SSL port=993 --trace

Results

(in C:/Ruby187/bin)

- Invoke redmine:email:receive_imap (first_time)
- Invoke environment (first_time)
- Execute environment
- Execute redmine:email:receive_imap
  rake aborted!
  getaddrinfo: The storage control blocks were destroyed.

Any help on idea on what is causing it?

I am Running it on Windows / mysql.

Thanks, help very appreciated.

Leonardo

That's your error, which from a quick google search boils down to the windows ruby not being able to handle IPv6.
