Description

Hi,
I think this relates to all activities pages:
The current month of the page is not displayed nowhere on the page when there's no activity for it.
I have to look at the status bar info to see the url of the Next and Previous links for determining which month I am on. It's a little confusing.

Regards,
Nikolay

History

In fact, I saw the setting "Days displayed in project activity".
My description above is not so good. Maybe there has to be period displayed on the activity page.

The activity view now displays the last N days rather than the current month.
Displaying the month name could lead to misunderstandings since the month may not be entirely displayed (eg if you choose to display less than 30 days).

What do you propose ?

Yes, you're right, JP.
In #note-1 I tried to explain that maybe it's better to display the dates from the period in Previous and Next links.

Previous url.../activity?from= **2008-02-22** to Next Url .../activity?from= **2008-03-03**

Somethin like: *Period: 2008-02-22 to 2008-03-03*

Maybe this will be ok. What do you think?

JP, sorry for bothering you again with this litter whim.
There was something misunderstanding between us. The titles are cool now, but my thought was to display them on the page, actually. Like the **Activity** label.

Thanks,
Nikolay

I see. You'd like something like this at the top of the page, don't you ?

```
From 2008-03-10 to 2008-03-15
```
