Redmine - Feature #8599

Calculated Custom Field?

2011-06-13 22:36 - Andrew Parnell

Status:	Closed	**Start date:**	2011-06-13

Category:	Custom fields	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Duplicate		

Description

- For every project I use an estimate of % Done * Estimated Hours of each ticket to calculate the completion % of a project
  - For example: A completed ticket (100%) of estimated hours: 2 and an in progress ticket (50%) of estimated hours: 8 shall give me a project completion % of 60% [(2*1)+(8*.5)]/(2+8)
- In order to get the "hours completed" estimate, i need a custom field which is the product of % complete * estimated hours
- Can I create a "caluclated" custom field that automatically is calculated based on these two values?
