<b>Resolution:</b>			

#### Description

Having some projects with subprojects created like those from tests

[✔ Apply](#) [🔄 Clear](#) [📄 Save custom query](#)

**eCookbook**

Recipes management application

- Private child of eCookbook   
This is a private subproject of a public project
  - Child of private child  
This is a public subproject of a private project
- eCookbook Subproject 1
- eCookBook Subproject 1
- eCookbook Subproject 2
- eCookbook Subproject 2

**OnlineStore**

E-commerce web site

will show up in the group settings with checkboxes as a tree (at least when looking at the html code):

**Add projects** ✕

✔ Projects

<input type="checkbox"/> eCookbook	<input type="checkbox"/> Child of private child	<input type="checkbox"/> eCookbook Subproject 2
<input type="checkbox"/> Private child of eCookbook	<input type="checkbox"/> eCookbook Subproject 1	<input type="checkbox"/> OnlineStore

✔ Roles

<input type="checkbox"/> Manager	<input type="checkbox"/> Developer	<input type="checkbox"/> Reporter
----------------------------------	------------------------------------	-----------------------------------

The unexpected behavior has two different occurrences.

1) Checking and unchecking a subproject causes it to be unchecked when double checking the parent project.

2) Doing the same as in 1) and try to uncheck the parent project will keep it locked until all subprojects are checked.

**Note:** RM version 5.0.9 is also affected.
