Resolution:					
Description					
Redmine 1.2.2:					
It could be interes	sting to make the "Required" optic	n overridable per project.			
On our 200 projec	cts redmine, we added a field and	make it "Required" "For all project".			
Now, one project	have nothing to do with that custo	om field, and we see two options:			
	custom field for one project, or at custom field "For all project" and a	least, make it not "Required" (imposs activate it in 199 project settings	sible today, an	d our whished solution)	
Maybe related to	<u>#5127</u> and <u>#1853</u> .				
Regards.
