confirmed!

This behaviour may be correct. In this case the state-dropdown in the form should be reduced to the default state.

Is that fixed?

The "Duplicate" action has been integrated into "Copy" action in [r8552](#), so Redmine 1.4.0 and later does not have the action.

In Redmine 3.4.0 or later, the status is reset to the default when copying ([#23610](#)).
