I made modifications to redmine_watcher_groups plugin to run it with Redmine 3.1.1.

See [\[\[https://github.com/foton/redmine_watcher_groups.git\]\]](https://github.com/foton/redmine_watcher_groups.git)

redmine_watcher_groups allows you to add watchers individually or/and by group. On Issue create or update.

I have attempted many different "watchers by group" plugin installations on a local redmine testbed (bitnami redmine, redmine at v3.2). Has anyone gotten this plugin mentioned (redmine_watcher_groups) to work with Redmine 3.2?

Thanks
