

Redmine - Defect #10168

CSV export breaks custom columns

2012-02-07 16:01 - Wolfgang Schnerring

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	1.4.0	Affected version:	1.3.1
Resolution:	Fixed		
Description			
<p>The CSV export gained the ability to display all sorts of columns through #4742 (tested with Redmine r8808, 1.3-stable branch), but the current implementation bypasses the column API, thereby breaking custom columns (e.g. provided by plugins).</p> <p>issues_to_csv calls value = issue.send(column.name) for non-custom-field columns, even though QueryColumn defines #value(issue) to retrieve the column's value, if I understand that correctly.</p>
