<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Issues	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>	Invalid		
<b>Description</b>			
Ability to accept an incoming email which uses keywords in the address, subject and/or body to trigger creation of issues.			
One use case would be for clients to be able to send emails without participating in the internal tracking system, other use case would simply be for convenience (the system could show the email address to logged in users).
