| Redmine 1.3.0 | | | |
| Typing test-www.example.com creates a link only for the "www.example.com" part, but the host is "test-www", and not "www". | | | |

Associated revisions

Revision 11474 - 2013-02-24 13:56 - Jean-Philippe Lang

Restricts characters before auto links (#10277).

Revision 11566 - 2013-03-09 10:17 - Jean-Philippe Lang

Merged r11474 from trunk (#10277).

History

#1 - 2012-02-20 07:00 - Fares Abdullah

I have to use <pre> to describe the above:

Typing test-www.example.com creates a link only for the "www.example.com" part, but the host is "test-www", and not "www".

#2 - 2012-02-28 11:09 - fangzheng (□□)

How about adding the prefix "http"?

That will create the link as:

<http://test-www.example.com>

Maybe the Text formatting is not that smart as we expect ;)

#3 - 2012-02-28 12:31 - Etienne Massip

- Category set to Text formatting
- Status changed from New to Confirmed
- Target version set to Candidate for next minor release
- Affected version (unused) set to 1.3.1
- Affected version set to 1.3.1

#4 - 2012-02-29 03:09 - fangzheng (□□)

Maybe the "www" is the root cause?

See in below:

test@example.com

test@www.com

test@example.com

test@www.com

By the way, most URLs can not be recognized w/o "www" (and prefix).

e.g.

news.google.com

#5 - 2013-02-24 13:58 - Jean-Philippe Lang

- Status changed from *Confirmed* to *Resolved*

- Assignee set to *Jean-Philippe Lang*

- Target version changed from *Candidate for next minor release* to *2.3.0*

- Resolution set to *Fixed*

Fixed in r11474. test-www.example.com will no longer generate a broken link. Use protocol (eg. http://) for URLs that does not start with www.

#6 - 2013-03-09 10:17 - Jean-Philippe Lang

- Status changed from *Resolved* to *Closed*

Merged.
