

Redmine - Feature #10325

Text formatting: textile not working for i.e. styles

Description

Trying to use advanced textile syntax won't work as expected, but seems to be implemented halfway. Example:

The phrase

```
| %{color:red}red%
```

should create HTML code like

```
| <span style="color:red">red</span>
```

but creates only

```
| <span>red</span>
```
