Redmine - Feature #10341

Access issue form with a specific role

2012-02-29 08:02 - Luis Serrano Aranda

Status:	New	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Issues	**Estimated time:**	0.00 hour
Target version:			
Resolution:			
Description			
I think a good feature are add the option of try the role inside a issue (if the member as two or more roles inside the project)			

History

#1 - 2012-03-08 16:37 - Etienne Massip

- Subject changed from New feature to Access issue form with a specific role

- Category set to Issues

What is the interest of it?

As a "workflow" designer, to test the issue form?

#2 - 2012-03-08 16:51 - Luis Serrano Aranda

Inside a project, a member can have more than one role (eg tester and developer), each of the roles have differents workflows.
As is done so that a member has a task with the developer role and another task with the tester role (only)
