<b>Description</b>	
Before I applied 675 there were options in the Mail Notifications page to choose what events to send notifications on. After r675 the screen is blank except for a test mail message link.	

#### History

Never mind you answered this in

[http://rubyforge.org/forum/forum.php?thread\\_id=17168&#38;forum\\_id=7504](http://rubyforge.org/forum/forum.php?thread_id=17168&#38;forum_id=7504).

We would still like the option to customize them as we really only want Issue notifications and none of the others.
