<b>Resolution:</b>	
<b>Description</b>	
<p>There is no revision-management for any file uploads.</p> <p>Uploads are put into a directory and if changed the old version is gone.</p> <p>How about putting them into a SVN-repository (local to the redmine installation or configurable on another server) and get full revision handling on them.</p> <p>There should be the possibility to delete old revisions of the file if wanted.</p> <p>No need for SVN though, revision handling could be build without it, because only a small subset is needed.</p>
