

Redmine - Defect #10495

Wrong links in plugin "Simple CI"

2012-03-20 11:16 - Joerg Jans

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Core Plugins	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.2
Resolution:			
Description			
<p>The links in the plugin "Simple CI" are wrong. They link to the project page in Redmine instead of the external page. The problem is caused from a wrong field in the file redmin_simple_ci/app/views/simple_ci/show.rhtml. Instead of build[:url] the expression build[:link] must be used. The following code works fine in my environment.</p>			
<pre><% if @builds %> <h2>Continuous integration</h2> <% if @builds.empty? %> <p class="nodata"><%= l(:label_no_data) %></p> <% else %> <div id="builds"> <% @builds.each do build %> <% content_tag('div', :class => 'build ' + (build[:success] == true ? 'success' : 'failure')) do -%> <%= format_time(build[:time]) %>: <%= link_to build[:title],build[:link] %>

 <%= build[:description] if (@show_descriptions == 2 (@show_descriptions == 1 && !build[:success])) %>
</div> <% end -%> <% end %> </div> <% end %> <% content_for :header_tags do %> <%= stylesheet_link_tag '/plugin_assets/simple_ci/stylesheets/simple_ci' %> <% end %> <% end %></pre>
