<b>Description</b>	
If you click twice on a form - e.g. creating an issue or creating a time entry then I end up with duplicate entry in the database. Tested on the demo site also. It shows the same behavior.

I think this is not a "defect", since duplicate issues are valid, in fact.  
However, disable the submit button after clicked will be a better way to avoid this mistake.

- Status changed from New to Closed
- Resolution set to Duplicate

Same as [#6555](#), fixed in [r9391](#) for 1.4.0.
