Redmine - Defect #10647

Other projects statuses show up at pull down list on issue filtering

2012-04-12 11:57 - Tiffany C

Status:	Closed	**Start date:**

Target version:			
Resolution:	Duplicate	**Affected version:**	

Description

Hi. I noticed that when I use "Status" and "is" to filter my tickets at the Issues page, other projects statuses also show up on the pull down list. I understand that a parent project will include children project statues, but not other projects.

I'm not sure if it is a defect or feature. I have seen several issues (#5385 #7703), which are similar to this problem, but they haven't had any response from Redmine developers yet. I have just applied the patch on #5385, and it seems working fine.

It would be nice if Redmine developers would take care of this issue.

I appreciate your consideration.
