Description Hi, I would be grateful if more details could be included in the project API listing. In particular, I'd like to know which project has issue tracking enabled as I need to list projects and for each project list of issues. Currently, I need to try to load the project's issues and see if the response isn't 403... Example listing: http://demo.redmine.org/projects.xml Thanks. Krystof

- Status changed from New to Closed
- Resolution set to Fixed

Redmine 2.6 and later support listing enabled modules of a single project ([#17602](#)).

```
GET /projects/12.xml?include=enabled_modules
```
