## History

## #1 - 2012-04-24 20:57 - Jean-Philippe Lang

Did you make any change to lib/redcloth3.rb?

### #2 - 2012-04-24 20:57 - Jean-Philippe Lang

- Resolution set to Cant reproduce

### #3 - 2012-04-25 03:24 - Andrey Krot

No, i didn't. It seems to me, that the problem is in som special messages in mailbox. May be, this is a problem with Microsoft Exchange mail server. This problem happen already 3 times.

## #4 - 2012-04-25 09:14 - Etienne Massip

Run the rake task with the --trace argument to get the full trace of the exception.

And please check your production.log file content.

Do you have any plugins installed (see <u>SubmittingBugs</u>)?

#### #5 - 2012-04-25 15:31 - Andrey Krot

I've already run rake task with --trace parameter, and attached file is the result. It's very dificult to get information from production.log, because the error occured on the real productive base, and there are too many lines in log file. Of course, there are some plugins installed. There is the list of plugins.

## #6 - 2012-04-25 18:47 - Jean-Philippe Lang

Could you save one of these emails in raw format (.eml) and post it here please?

### #7 - 2012-04-26 03:18 - Andrey Krot

- File message.7z.001 added

- File message.7z.002 added

The problem message in attachment. I divide it into two files becaus of file size limitation

## #8 - 2013-04-26 08:12 - Andrey Krot

This issue does not solved. No ideas?

## #9 - 2013-05-02 08:42 - Toshi MARUYAMA

- Category set to Email receiving
