

Redmine - Feature #10775

Possibility to get the issue-id "while" entering it (via a placeholder)

Description	
It would be nice to get the issue-id "while" entering it via a placeholder.	
E.G.:	
Tracker: Patch	
Subject: Implementation of feature foo (branch user/#ID#-feature-foo)	
Redmine should exchange the #ID# with the issue-id when it stores the issue.	
Result:	
Subject: Implementation of feature foo (branch user/589-feature-foo)	
Right now there is the need to change the subject right after entering an issue to set the branchname correct.
