

Redmine - Defect #10915

Issue CSV export does not respect the "page=" request

2012-05-14 16:28 - Cheyenne Wills

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	1.4.2
Resolution:			
Description I was able to duplicate this using the redmine.org site.. <ul style="list-style-type: none">• go to: http://www.redmine.org/projects/redmine/issues• click on the "Also available in" CSV link<ul style="list-style-type: none">◦ A pop-up appears, just select the export button. A csv file is downloaded.• click on the "Next" link to go to the next page• click on the "Also available in" CSV link<ul style="list-style-type: none">◦ A pop-up appears, just select the export button. Another csv file is downloaded. <p>The contents of the two files are the same.</p> <p>I was expecting the 2nd csv file to contain the contents of the 2nd page.</p> <p>It appears that if you bypass the pop-up (javascript) by right clicking on the CSV link, the data is downloaded correctly.</p> <p>My web client is "Chromium Version 19.0.1084.36 (0)" running on a Gentoo system.</p>

You are right, but this is not a bug. The CSV link tries always to export all issues that where filtered (not the issues that are shown), but the export is limited by a maximal allowed issues. You can define the limit in admin settings.

I created a new issue [#13770](#)

Close this issue?

- Status changed from New to Resolved

I determined that the limit was due to the setting... so it is "working as designed". Feel free to close the issue. I addressed the problem with the users by providing them with a small program that runs their query via the REST API.

The new issue you opened will address letting the users know what is happening.
