I run this command from the redmine folder "/opt/redmine"

- Target version set to 2.1.0

Indeed, mentionned in tags source:/tags/2.0.0/lib/generators/redmine_plugin_model/USAGE but script/generate has been removed with other Rails 2 scripts.

Thanks to your document I managed to build a plugin by typing this:

./script/rails generate redmine_plugin plugin_name

The document include an error because it says ./script/generate instead of ./script/rails generate
