Description			
We just encountered a bug where there are two managers on a project, and a non-member of the project submits a new issue. Both managers (one of them is an admin for the whole tool) should be e-mailed, however only one (the admin) is receiving the e-mail.

Jean-Philippe, since nobody answer my queries in the forum. Perhaps you can help me here.

How does the non-members receive the e-mail when he is the watchers list?
