

## Redmine - Defect #10967

### Commit messages/comments should not convert subscripts to footnote references

2012-05-18 17:40 - Nathan Smith

| <b>Description</b>  |                                  |
| <p>Commit messages, like "Fixed problem with accessing a[0]", that contain subscript indices are converted by RedCloth into footnote references. See, for example, the commit message on <a href="#">r9278</a> and the "Associated Revisions" section of <a href="#">#10505</a>. Footnotes don't make sense on commit messages.</p> <p>My workaround, for the time being, is to format subscripts as "a[ 0 ]", with extra space around the index.</p> |                                  |
