<b>Description</b>			
There is any possibility to insert HTML fragments in wiki/project description?			
I was looking for similar functionality and so I added a simple macro to macros.rb. Here is the code snippet.			
<pre>desc "Insert html" + "\n\n" +   "  !{{html(html block)}} "</pre> <pre>macro :html do  obj, args    return CGI::unescapeHTML(args.join(", ")) end</pre>

Can you add this in a next release of Redmine ?

Not very safe for instances allowing wiki page editing to everybody.

It's true, but this feature allow you to add more informations to your wiki/issue.  
To control this feature, for example, you can add a new permission to group, no?
