Description			
It would be nice to bypass wiki formating, specially for this very project :)			
This way we can write better tracker description concerning to the Wiki itself.

You can, if you use pre and code tags

For example:

```
* not wiki _formatting_
```

```
h2. also not +wiki+ *formatting*
```

#2 - 2008-04-26 13:42 - Thomas Lecavelier

Maybe it could make sens to have a "verbatim" tag, rather than using the code one. Even if "code" do the job rather well, it could be interesting to have a tag with its content exclude from textilization.

#3 - 2008-04-29 19:12 - Leandro Lucarella

Yes, the pre+code option seems more like a hack to me, and you can use it for avoiding wiki formatting in something "embedded" in a paragraph.

#4 - 2012-10-30 21:11 - Daniel Felix

Well this seems to be solved with the "inline code" formating, doesn't it?

#5 - 2012-10-30 21:22 - Jean-Philippe Lang

- Category changed from Wiki to Text formatting
- Status changed from Resolved to Closed

While I personally prefer to use pre tags, Textile also offers the notextile tag and it can be used inline:

```
This <notextile>*won't* be formatted</notextile>.
```

gives:

This *won't* be formatted.
