Redmine - Defect #1119

Links to repository directories are broken in git

2008-04-27 07:34 - Leandro Lucarella

Status:	Closed		**Start date:**	2008-04-27
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:	0.7			
Resolution:	Fixed		**Affected version:**	

Description

When making a link to a repository directory (using source\:repo/dir syntax) instead of showing the directory tree, it shows a file content which has some git info, like:

```
tree HEAD:repo/dir

file_1
file_2
...
file_N
```

Where file_i are the directory contents.

Associated revisions

Revision 1365 - 2008-04-27 12:12 - Jean-Philippe Lang

Fixed: Links to repository directories don't work (#1119).

History

#1 - 2008-04-27 12:13 - Jean-Philippe Lang

- Category changed from Wiki to SCM

- Status changed from New to Closed

- Target version set to 0.7

- Resolution set to Fixed

Actually, this problem was not specific to git.
It's fixed in r1365. Linking to a directory will now display the browser.
