

Redmine - Defect #11198

When issue_observer calls Mailer.deliver_issue_add(issue), email does not send

2012-06-19 22:00 - Matt Brown

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	1.3.1
Resolution:	Invalid		
Description			
<p>Hello,</p> <p>I am using rake to issue the script to poll an IMAP server for incoming mail.</p> <p>After debugging it's clear that the mail is received, an issues is created, and that the issue_observer calls Mailer.deliver_issue_add(issue).</p> <p>However, an Email notification is never sent.</p> <p>Why is this?</p> <p>In fact, I call Mailer.deliver_issue_add(issue) at other locations, and an email is never sent. However, Mailer.deliver_issue_edit(journal) sends Email perfectly fine.</p> <p>If anyone has any ideas, it'd be greatly appreciated.</p> <ul style="list-style-type: none">- mysql Ver 14.14 Distrib 5.1.52, for pc-linux-gnu (i686) using readline 5.1- ruby 1.8.7 (2011-12-28 patchlevel 357) [i686-linux]- rails 2.3.11- there is no error stack trace. <p>Thanks,</p> <p>Matt</p>			

History

#1 - 2019-06-08 05:30 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Invalid

Redmine 2.4 and later don't have IssueObserver. It has been removed in r12021.
