Target version: 2.0.4	Affected version: 2.0.3
Resolution: Fixed	

Description

If Wiki diff has a new line (not a changed line), diff page may generates broken HTML like:

```
<div class="text-diff">
h1. CookBook documentation
<br /> Some updated [[documentation]] here... <span class="diff_in">
<br /> More contents...&lt;/span&gt;
</div>
```

Close tag is escaped.

For example:

Before

```
h1. CookBook documentation
Some updated [[documentation]] here...
```

After:

```
h1. CookBook documentation
Some updated [[documentation]] here...
More contents...
```

"More contents..." line is added. This case, diff page generates broken HTML.

- File 0001-Fix-too-escaped-span-in-diff-page-for-Wiki-11209.patch added

I attach a patch and test case for this issue.

It adds a new fixture data. So it may break other tests. I only tested this patch against test/functional/wiki_controller_test.rb. Sorry.

Thanks!

I've also found a similar problem in Wiki update notification mail. I'll submit a new ticket with test case later.
