**Description**

Hi, I just installed the latest version of redmine with rails 3.2.6. It works fine on my machine, which uses mysql, but I uploaded it to heroku, which uses postgres, I get this error related to the Setting model and I can;t view any page:

Started GET "/" for 24.124.99.17 at 2012-06-22 03:08:46 +0000  
Processing by WelcomeController#index as HTML  
Completed 500 Internal Server Error in 5ms  
ActiveRecord::StatementInvalid (PG::Error: ERROR: relation "settings" does not exist  
:SELECT a.attname, format\_type(a.attypid, a.atttypmod), d.adsrc, a.attnotnull  
FROM pg\_attribute a LEFT JOIN pg\_attrdef d  
ON a.attrelid = d.adrelid AND a.attnum = d.adnum  
WHERE a.attrelid = "settings"::regclass  
AND a.attnum > 0 AND NOT a.attisdropped  
ORDER BY a.attnum  
):  
app/models/setting.rb:152:in `check\_cache'  
app/controllers/application\_controller.rb:81:in `user\_setup'

any thoughts? Thanks!
