Description hi, i need to have in role page a dropdownlist with group selection. the persons in this group will be assignable in a demand by the person who have this role. ex: A is a client.role client and group assignable ruby this client create a demand and can only assign this demand at groups ruby. in the group ruby, we have only person who manage ruby dev team.(Chief Ruby_A,Ruby_B) Ruby_A have a role management_ruby, he create under task and can assign this under task at groups dev_ruby. I have installed netbeans, i don't know ruby language but i can working on it. I just need that anyone explain me the simple way to do that. Excuse for my english, i'm french(i know, it 's not a reason)
