<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b>	
here: <a href="http://www.redmine.org/settings/edit?tab=general">http://www.redmine.org/settings/edit?tab=general</a>	
Option 'Host name and path'	
Setting.host_name automatically sugested as @guessed_host_and_path	
My suggestion:	
change hint from 'example: XXX' to 'leave blank to use: XXX'	
also set default valule to black instead of 'localhost:3000'	

#### History

as i understand there are no problem to autodetect hostname cause code do this already. This issue allow to autosetup redmine instance so it will be easy to use. Do you disagree?
