**Description**

Like in [#6945](#) described (but not only for redmine.org) ...

It would be nice to have a ticket voting like in the most popular ticket systems (+1).

This is very useful to define which issue / request has the most backup from the community/customers.  
It would be also very nice to have a little overview of all users which have voted for implementation.

A user should...

- ... be able to vote for an issue
- ... remove his vote from an issue
- ... see which other users had voted for this issue

What do you thing about it?

### History

#### #1 - 2012-09-23 21:21 - Daniel Felix

What do you think, is this a good idea for an implementation?

#### #2 - 2012-09-24 00:16 - Jerzy Kopiec

- Assignee set to Toshi MARUYAMA

test

#### #3 - 2012-09-24 00:22 - Toshi MARUYAMA

- Assignee deleted (Toshi MARUYAMA)

#### #4 - 2013-03-02 01:13 - Tilman Kalckhoff

Sounds brilliant. Having this in would make Redmine much more usable for groups with bigger communities who tend to work on several projects at the same time.

#### #5 - 2013-03-31 19:36 - Maxim Krušina

+1 (LOL)

Exact behaviour should be configured via roles:

- Voting
  - Manage voting
  - Can vote
  - View votes

And voting should be enabled by...?

Seems logical per tracker (doesn't make sense vote for bugs)

It should be enabled per project (there will be some projects without voting at all).

**#6 - 2014-06-22 19:35 - Deoren Moor**

+1 ;)

**#7 - 2014-06-24 14:12 - @ go2null**

Isn't this a *Duplicate of* (rather than *Related to*) [#6945](#)?

(Just trying to clean up my Watched issues :-))

**#8 - 2014-07-17 13:14 - Robert Pollak**

No, it's a duplicate of [#1011](#).

**#9 - 2014-07-20 17:59 - Toshi MARUYAMA**

- *Status changed from New to Closed*

- *Resolution set to Duplicate*
