Redmine - Defect #11697

Problem with Wiki export to PDF / HTML / TXT — 'include' does not includes

2012-08-24 15:06 - Leonid E

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Wiki		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	2.0.3

Description

If you try to print Wiki page, using export e.g. to PDF, you can find a conflict with {{include(___)}} Macros.

For example:
Page consists with a several include Macros, and it is full of text.

```
{{include(page1)}}

---

{{include(page2)}}

---

{{include(page3)}}

---

{{include(page4)}}
```

The final PDF version will include only plain text, that you can see in Edition mode (find above), but not final version with included Macros with text and images.

History

#1 - 2015-10-13 15:20 - David Lukas Müller

I can reproduce this issue with the following environment:

```
Environment:
  Redmine version                2.4.2.stable
  Ruby version                   1.9.3-p484 (2013-11-22) [x86_64-linux]
  Rails version                  3.2.16
  Environment                    production
  Database adapter               MySQL
```

Hi,

I have the same issue with the 2.6 last version, but I have another instance with 3.4.4 version where this is fixed.
This was fixed with the Version 3.0.0 (#13051).
So this ticket can be closed.

Thank you for pointing it out. But we cannot close this issue because PDF and html export render macros but text export does not.

IMHO, text export should export source code of the page, so macros should not be rendered.
