Description

I have install the redmine 2.0.3 and git on Centos server.

The redmine directory and the git repositories directory's owner is apache.

If I create a project on the git, the redmine can find the file and change history of it.

But when i click the "diff" button , the redmine give a internal error.

From the production.log , I got the following messages:

Try to clean your cache with rake tmp:cache:clear?

#11 - 2012-10-26 17:04 - Etienne Massip

If it doesn't work, you can try to replace <% cache(@cache_key) do -%> with <% cache(@cache_key, nil) do -%> directly in the code.

#12 - 2012-10-28 08:41 - Dimitri Sapunou

<% cache(@cache_key, nil) do -%>

Not work.

Solution

Upgrade Ruby version to 1.9.3

```
Environment:
  Redmine version                2.1.2.stable.10701
  Ruby version                   1.9.3 (x86_64-linux)
  Rails version                  3.2.8
  Environment                    production
  Database adapter               Mysql2
Redmine plugins:
  redirect_to_after_login        0.0.2
  wiking                         0.0.1b
```
