

Redmine - Defect #11768

Mail Receiving Does Not Work

2012-09-04 08:37 - ☐ ☐

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:		Affected version:	2.0.3
Resolution:	Invalid		

Description

About your application's environment:

```
Ruby version          1.9.3 (x86_64-linux)
RubyGems version      1.8.24
Rack version          1.4
Rails version         3.2.6
Active Record version 3.2.6
Action Pack version   3.2.6
Active Resource version 3.2.6
Action Mailer version 3.2.6
Active Support version 3.2.6
```

```
Middleware            Rack::Cache, ActionDispatch::Static, Rack::Lock, #<ActiveSupport::Cache:
:Strategy::LocalCache::Middleware:0x00000001362418>, Rack::Runtime, Rack::MethodOverride, ActionDi
spatch::RequestId, Rails::Rack::Logger, ActionDispatch::ShowExceptions, ActionDispatch::DebugExcep
tions, ActionDispatch::RemoteIp, ActionDispatch::Callbacks, ActiveRecord::ConnectionAdapters::Conn
ectionManagement, ActiveRecord::QueryCache, ActionDispatch::Cookies, ActionDispatch::Session::Cook
ieStore, ActionDispatch::Flash, ActionDispatch::ParamsParser, ActionDispatch::Head, Rack::Conditio
nalGet, Rack::ETag, ActionDispatch::BestStandardsSupport, OpenIdAuthentication
```

```
Application root      /www/redmine
Environment            production
Database adapter       mysql2
Database schema version 20120422150750
```

the command I run:

```
/usr/local/rvm/gems/ruby-1.9.3-p194@global/bin/rake -f /www/redmine/Rakefile redmine:email:receive
_imap RAILS_ENV="production" host=HOSTNAME username=redmine password=12345678
```

and I test this too:

```
/usr/local/rvm/gems/ruby-1.9.3-p194@global/bin/rake -f /www/redmine/Rakefile --silent redmine:emai
l:receive_pop3 RAILS_ENV="production" host=HOSTNAME username=redmine password=12345678 delete_unpr
ocessed=1
```

and this:

```
rake -f /www/redmine/Rakefile --trace redmine:email:read RAILS_ENV="production" < /tmp/redmine (my
raw mail file)
```

all I got is:

```
Non US-ASCII detected and no charset defined.
Defaulting to UTF-8, set your own if this is incorrect.
```

and my Redmine did NOT get any reply :-(

I am sure the mail was encoding with UTF-8 (in Chinese),

and I checked my mail server,
these mails for Redmine marked as READ after I ran these commands above.

I think Redmine had receiving these mails, but it could NOT write to database (?)
is there any log I could trace ?
or I missing something ?

History

#1 - 2012-09-04 08:39 -

I setup Redmine in RHEL 6.2 x86_64, using RVM and run with Apache feat. Passenger
I using LDAP as auth method.

my reference:

<http://www.redmine.org/projects/redmine/wiki/RedmineReceivingEmails>

<https://we.riseup.net/cgdev/using-email-with-redmine>

<http://serverfault.com/questions/287631/how-can-i-configure-redmine-to-create-or-update-new-issues-via-email>

thank you so much!

and thank Redmine so much! (it help me a loooooooooooooo!)

MailHandler: ignoring email from unknown user [zx1986@gmail.com]

#4 - 2012-09-10 08:04 -

- Status changed from New to Resolved

- % Done changed from 0 to 100

my mistake ...

my e-mail doesn't match with mail of the Redmine account

I'm so stupid

#5 - 2012-09-10 09:45 - Etienne Massip

- Status changed from Resolved to Closed

- Resolution set to Invalid

Thanks for the update =)
